

Life Prediction Division Agenda for Spring 2002

1. Chris Williams, Yung-Li Lee, John T. Rilly: "A method for determining reliability-based strain-life curves," DaimlerChrysler.
(20min including questions)
2. Fengjie Yin, "Fatigue and Deformation of Case-Hardened Components,"
University of Toledo
(20min including questions)
3. Helmut Dannbauer, "Benchmarking Fatigue Software on Automotive
Components
and Improvements in Bending-Torsion Predictions," Magna Steyr
Engineering
(20min including questions)
